## **Dairy Vocational School of Ioannina**

### **A Tradition of Excellence**

The Dairy Vocational School of Ioannina, rooted in the historic 1934 cheese-making school, continues to lead Greece in modern dairy education. The 2-year program includes a six-month internship, with free accommodation and meals for all students.

### **Modern Facilities & Practical Training**

Students train daily in an EFET-licensed dairy unit, processing **300–500 kg of milk** into cheese, yogurt, butter, ice cream, and more. Upgraded facilities and accessible laboratories support high-level hands-on learning, inspected regularly for national and EU compliance.

### **Skills for Today's Dairy Industry**

Training combines theory with real production, covering dairy technology, quality control, food safety, and ARTEMIS submissions. Mechanical engineers and specialized trainers ensure cutting-edge instruction, while support services through Shedia provide personalized guidance.

### **Growing Interest & International Reach**

The school attracts students seeking strong job prospects and entrepreneurial opportunities, supported by active social media recruitment. International collaborations include European projects, global graduates, and representation in FACEnetwork.

## Career Opportunities

Graduates enter roles in dairy industries, cheese factories, yogurt and ice cream production, livestock units, quality assurance, or start their own businesses.

## A Glimpse Inside

A recent tour by **Alexandra Mega** highlighted the fully equipped, accessible laboratory where students gain real-world experience.

The Dairy Vocational School of Ioannina continues to blend tradition, technology, and hands-on training—preparing skilled professionals for a competitive and evolving dairy sector.
